objective

Use data analysis and operations knowledge to catalyze revenue growth and transform the consumer experience

experience

07/14—curr. **Operations Specialist**

Digimarc, San Mateo

Summary: Use data analysis tools and visualization in order to assist rights holders with protection and enforcement through operationalizing efficiency in value-added products and services.

Product Analysis:

- Utilized open source tools such as R (with packages ggplot2, dplyr, knitr) in order to provide insight for management team and key clients into the efficacy of company product.
- Responsible for analysis projects from data warehouse querying (MySQL/MSSQL/SQL Server) to exploration to presentation.

Operations Support:

- Utilized Sharepoint to create and populate knowledge base for internal stakeholders with original training material for sales education.
- Maintain internal Sharepoint sites to empower management to store and create protocols and standards for operations and sales.

Data Visualization:

- Created and scripted ad-hoc customer and operations reports for use in marketing collateral and relationship management using R, excel, Glify.
- Designed, wireframed and created proof-of-concept visual reports.

Workflow Documentation:

- Researched and documented business processes, including working with Guardian VP and IT team to scope and lead initial stages of Salesforce implementation.

Salesforce administration:

- Created on-boarding process and accompanying documentation to increase user adoption rates, inform the implementation road map, and increase sales reporting accuracy.
- Integrated third party automation tools such as Pardot, InsideView, LinkedIn Navigator with sandbox Salesforce instance to automate sales cycle.
- Utilized Dataloader, excel, and R to migrate and clean data between Salesforce and Dynamic instances.

07/14—curr. **Sales Operations Lead**

RecruitLoop, San Francisco

Summary: Managed lead generation and infrastructure scaling for sales and growth team at early-stage recruiting startup. **Salesforce Administration:**

- Customized Salesforce to create objects, applications, reports and dashboards to enable the sales team to meet their quotas.

Research Team Management:

- Hired and trained team of 10 freelancers, as well as handled billing and performance tracking, in order to scale volume of lead generation from 200 (leads/rep/month) to 2000 (leads/rep/month).

Sales Operations:

- Researched, identified and integrated products for outbound sales that decreased cost of lead acquisition by half while scaling volume (including conducting vendor negotiations and initiating beta trials)

Email Marketing:

- A/B tested subject line, body text and send time to increase email engagement rates by 30 percent, enabling sales team to identify and connect with prospects, while scaling email volume).

12/13–04/14 **Business Operations and Accounts Manager**

eSalon, San Francisco

Account Management:

- Managed billing, business communications, and account creation for clients of team of 10 employees.

Operations:

- Provided great customer service and cultivated client relationships by leading employee training and maintaining employee calendars.
